Q22: Are there any other options besides BlueGogo for live data transfer? A23: There are several other options; however, the only options that I am aware of are BlueGogo and Zebra. Q23: Does the host computer use an ethernet connection? A24: Yes, I do believe that both the Mac and PC use ethernet connections. Q24: Is it possible to stream live data in two-way? A25: No, it cannot send live data in two-way because the hardware is not built to support it. Q25: Do you charge for extra time? If yes, how much? A26: Yes, you do charge extra time for the extra time you need. The extra time can be with or without the live data. Q27: Where is the code located? Where do I save it? A27: The code is located on the host computer. You do not need to save it anywhere. Q28: I tried copying the code and the Live Data doesn't work. Does this mean that I have to save it somewhere? A28: Yes, you do need to save the code somewhere, otherwise it does not work. Q29: How do I install an updated version of the code? A29: You will need to place the code on the host computer. Q30: Can you explain how the components work together, more specifically how the Mazak hardware and the host computer communicate? A30: Everything on the Mazak control system is associated with one device. The hardware is software, and vice versa. The firmware associates the two together. The Mazak hardware and the software communicate with each other via a proprietary control protocol that the firmware uses. As the firmware is the most important part of the system, the firmware is typically the more complex part. Q31: Is it possible to use a computer with a different type of chip? A31: Yes, it is possible to use a computer with a different type of chip. Once you start the Mazak live transfer for the first time, it should automatically detect the new chip. If it does not, then you will need to locate the chip, from the top of the machine, and press in the lever that is on the reverse side of the chip. Once you do this, it will connect to the Mazak control system automatically. Q32
